Virginia Grant, R.N. – Ginny started hospital work at 16 at an Allentown Hospital supporting the professional staff in patient care. In 1959 she entered the Germantown Hospital School of Nursing. Many hospitals offer a 3-year program in nursing. Following graduation, she undertook studies and graduated at the University of Pennsylvania. Her work experience includes obstetrics, medical surgery with a focus on orthopedic care. She also provided for the first woman to have radiation treatments and at Paoli Memorial the first person to receive a hip replacement. Future programs focus on the interests of the Explorers and supporting the mission of the Mill. Our exploration includes medical arts, marketing, social media as we define interests.
